

# Wolf City Design Precinct

As the city has grown there has been a need for more space. The Wolf City Design Precinct is a suburb built on reclaimed land over the sea, this is similar to Ari-Town another Wolf City suburb. The engineers of the Wolf Lego Nation have become experts at reclaiming land and the Wolf Design Precinct showcases this. It was decided that this land would not just be for people to purchase and do as they wished, but instead a carefully designed area to showcase Architecture, Urban design and Landscape Architecture. By comparison to most cities where architects are responsible for less than 1% of the built environment, the design precinct will have architects involved in everything at every level. This would be the first suburb on the planet where every building is architecturally designed. The Top designers on the planet were invited to be a part of this project and the results speak for themselves. Not only is the Wolf Design precinct a shining example of great design, but it is also a wonderful place to live for those lucky enough to have a home there....(it's not cheap).

All spaces have a sea views and are in close proximity to pristine beach fronts.
